Real-time Architecture ও Data Flow

কিভাবে live odds user পর্যন্ত পৌঁছায় — সম্পূর্ণ data pipeline

⚡ Total Latency: < 500ms end-to-end

User Bet Placement Flow — কিভাবে bet process হয়

1	User clicks 'Place Bet'	Browser-এ bet slip confirm করা
2	API Gateway receives request	Auth validation + rate limit check
3	Bet Engine validates odds	Odds lock — placement time-এর rate fix
4	PostgreSQL writes bet record	Idempotency key — duplicate prevention
5	Risk Engine evaluates	Liability check + sharp player detection
6	Payout calculator runs	Exact payout amount calculation
7	User gets confirmation	Real-time push via WebSocket

UI/UX Design Guidelines

Platform design principles & important UI tips

Color Coding System

Profit/Win → সবুজ (#10B981)
Loss/Negative → লাল (#EF4444)
Pending → হালুদ (#F59E0B)
Neutral → ধূসর (#64748B)

Universal Search Bar

প্রতিটি menu-তে search/filter — User ID বা Transaction ID দিয়ে instant find করা যাবে

Mobile-First Design

WCAG 2.1 AA compliance, screen reader support
Dark mode default — battery & eye-friendly
PWA — offline support, home screen install

Performance Requirements

Page load < 2 seconds — Core Web Vitals pass
Bet placement confirmation < 500ms
Odds update < 500ms — real-time feel

Navigation Structure

Max 3 clicks to any feature
Sticky header with balance display
Quick bet shortcuts — home screen widget

Accessibility

Screen reader compatible markup
Keyboard navigation support
High contrast mode option
Font size adjustment

Security Architecture — সম্পূর্ণ নিরাপত্তা কাঠামো

Platform-wide security measures, encryption ও access control

DDoS Protection

Cloudflare Enterprise — layer 3/4/7 DDoS mitigation
AWS Shield Advanced — volumetric attack protection

Authentication

Hardware 2FA — YubiKey/Google Auth for Admin
JWT + Refresh Token for Users
OAuth 2.0 — Social login integration

Encryption

SSL/TLS 1.3 everywhere — HTTPS mandatory
Database encryption at rest — AES-256
API payload encryption — sensitive data

Access Control

IP Whitelisting — Admin panel VPN-only access
RBAC — granular module-level permissions
Session timeout — idle disconnect

Monitoring & Logging

Real-time anomaly detection
Full audit trail — every action logged
PagerDuty alerts — critical incidents

Security Testing

Quarterly penetration testing
OWASP Top 10 compliance check
Code security review — CI/CD integrated

Network Security

VPN for internal communication
Private VPC — database isolation
WAF rules — SQL injection/XSS prevention

Compliance

GDPR data handling
PCI DSS — payment data security
ISO 27001 — information security management

SEO ও Marketing Module

Player acquisition, retention ও affiliate marketing সম্পূর্ণ কৌশল
